

How *Hackers* infiltrate a Company Network

#1 Impersonating Employees

They send Emails using a hacked Email address to employees and start a conversation

#2 Social Engineering

They follow Social media to get the names and interests of employees and their bosses

#3 Phishing

They send deceptive Emails to employees, hoping one will provide a password and reveal secret company information

#4 Finding Weak Links

They prey on Employees with their guard down or who don't follow company rules

Don't be a *Hacker* helper
